PILOT LAUNCH

Concur + Power BI Expense Analytics — Pilot

Interactive, role-based expense dashboards are coming to Finance & business teams.

Pilot sessions begin the week of July 28, 2026 — invitations are on their way.

Dear Team,

We are pleased to announce the launch of the **Concur + Power BI Expense Analytics pilot**. Starting the week of July 28, selected Finance and business-unit users will have access to a new set of interactive Power BI dashboards connected directly to SAP Concur — giving everyone a faster, richer, and always up-to-date view of expense data.

2×

Automatic daily
data refresh

0

Manual spreadsheet
exports required

1

Single trusted source
shared across all teams

What's changing

Interactive dashboards — explore expense data with free-form filters, drill-downs, and cross-dimensional views not available in standard Concur reports.

Automatic refresh, twice a day — data is always current with no manual intervention; no more outdated spreadsheet exports.

Role-based views by Cost Center — each team sees a view scoped to their own data, with the same access controls already in place in Concur.

Period-over-period comparisons — full history is preserved, enabling monthly, quarterly, and yearly trend analysis in a single report.

No change to the expense process — Concur remains the single source of data. The way you submit and approve expenses stays exactly the same.

How to be ready

ACTION REQUIRED FOR PILOT PARTICIPANTS

If you have been selected for the pilot, please be ready for your scheduled session. No installation is required — the dashboards run directly in your browser via Power BI Service.

- **Attend your pilot session** — an Outlook calendar invitation has already been sent with the link to the Power BI workspace and the session agenda.
- **Bring a real-world question** — think of a cost or spend question you currently answer via a manual export. We will try to answer it live during the session.
- **Complete the feedback form** — after the session you will receive a short survey; your input directly shapes the next iteration of the dashboards.

Support and resources

WE ARE HERE TO HELP

Drop-in support hours will be available from **July 28 to August 8 at 10:00 AM MST**. An Outlook calendar invitation has already been sent to all pilot participants.

For background reading and the full dashboard overview, please visit our SharePoint page: [Concur + Power BI Analytics Pilot](#).

We appreciate your collaboration and look forward to hearing your feedback. This pilot is the first step toward giving every team at AES a faster, clearer, and more autonomous view of expense data — and your input will be essential in making it as useful as possible.

Thank you,

The Finance Analytics Team
